

STREET GRACE™

Street Grace's Social Media

No-Go Zone

Below are a few apps that have made it into Street Grace's "No-Go Zone". We suggest the removal of these apps from youth devices due to the risks they pose.

Discord

Discord is a third party app used for game messaging. Gamers switch from console messaging to Discord to avoid the strict censorship/privacy settings of the game systems themselves. Risk Factors: Strangers, mature subject matter, and sextortion opportunities.

LiveMe

LiveMe is a live-streaming app that uses geolocation to match users. Within the app users can purchase "coins" to gift to each other, which have been used to "purchase" photos from minors. Risk Factors: Exposure to sexual content, addictive due to in-app purchases/gifts, and geolocation use.

Yubo

Yubo is a meeting app that connects users with others nearby to video chat. Previously known as "Yellow", Yubo has been dubbed the "Tinder for Teens". Risk Factors: Strangers, geolocation use, sextortion opportunities, and exposure to sexual content.
